

## LED indicator

For stand-alone indication of current values, an LED indicator is offered.

The bright LED display and large characters (14 mm) ensure that the displayed value is visible from a distance.

- Easy to set up.
- Easy installation in a 22.5 mm diameter hole, standard for light signal fittings.
- Supply voltage 24 V \*
- Data transfer
- Data transmission protocol ModBus RTU
- RS-485 / RS-485 interface
- Connecting directly to the vacuum gauge connector

**The relative position of the vacuum gauge and the sensor is arbitrary. It is convenient to place it on mnemonic diagrams of installations.**

**\*) external power supply required**
