

Heater- 400

The heater is designed to heat products in a vacuum chamber using a direct-heated tape heater.

Parameter	Value
Maximum current	160 A
Max. power	2,5 kW
Working temperature	50 – 350 °C
Weight	4 kg

Current leads and vacuum lead-in - water-cooled

Temperature control - by a temperature sensor (the sensor is installed on the drum with media, the sensor is connected through the central input)

Heater 400
